Location: **GIZ Office
Victoria Island,
Idejo Street 592, Lagos**

More info here: www.help-astrid.com/nigeria

Stem cell typing with
cotton swabs

No costs

In case you are a match: Donation typically via
stem cell collection from the blood

My name is Astrid (Ada). I was diagnosed with a particularly severe form of blood cancer – Acute Myeloid Leukemia (AML).

I am Nigerian-German and urgently need a stem cell donor to survive. Please help me to continue being there for my children, my husband and my friends.

Donors with a „non-white“ background are severely under-represented in the worldwide registries: 70% of all registered stem cell donors worldwide are white, whereas 85% of the world population is not.

Please come to the donor drive and register! Maybe you can be my guardian angel or another patient's.
